Samsung UHD TV
Ultra High Definition 4K

HU7000

AVAILABLE SCREEN SIZES: 55" 50" 40"

See more, do more with Samsung UHD TV

Samsung's HU7000 UHD TV provides four times* the clarity of Full HD, delivering breathtaking images. Thanks to Samsung's proprietary up-scaling technology, Full HD, HD and lower resolution content can achieve nearly-UHD clarity through a unique four-step process, so everything looks better. You can also take advantage of the HU7000's incredible processing speed and use Multi-Link to split your screen into four panels, allowing you to watch live TV and browse the Net simultaneously. And with the Samsung UHD Evolution Kit,** your UHD TV will be on the cutting edge.

SMART TV

Go beyond High Definition

With four times the pixel count of Full HD,* ultra-high definition (UHD) 4K represents the pinnacle of home-cinema viewing. UHD resolution delivers unmatched clarity and the immersive depth, rich vibrant colours, and photographic detail help recreate a cinema-quality experience. Watching movies or documentaries, or experiencing a concert on a Samsung UHD TV is like bringing your own personal cinema home.

Enhance all your entertainment with up-scaling

Samsung's unique 4K up-scaling process will enhance HD or Full HD content to match the resolution of your UHD TV so you can enjoy your library of content like you've never seen it before. From watching a classic, to experiencing live TV, Samsung 4-step up-scaling process makes all of your movies and shows look better than ever.

View more, play more

We've all heard of multi-tasking when it comes to work, but what about multi-tasking when it comes to watching TV? Multi-Link allows you to split your TV into four completely different screens. Now you can watch the game, browse the web, view ON TV recommendations or check your favourite social media websites and much more. Multi-Link enables you to go deeper into your entertainment.

UHD Upscaling

UHD Dimming

Multi-Link Screen

* Pixel count on Full HD 1080p = 1920 x 1080 = 2,073,600 pixels. Pixel count on UHD 4K = 3840 x 2160 = 8,294,400 pixels. Some restrictions may apply. UHD Evolution Kit sold separately. ** UHD Evolution Kit improvement levels are limited to year of launch and application availability. Actual performance may vary and is subject to model specifications and hardware limitations. UHD Evolution Kit may not support certain applications and functions previously installed or available on your TV. Please check www.samsung.com for more details before installing Evolution Kit. This feature is based on current UHD connectivity, broadcasting standards and Blu-ray standardization initiatives. These standards are subject to change which may require the purchase of a replacement Evolution Kit to remain current.
